WIRTSCHAFTSFORSCHUNG

Prof. Dr. Mario Larch

We are hiring a student assistant!

The Chair of Economics VI: Empirical Economics is looking for a student assistant to support us in our research and teaching activities.

Your responsibilities include, among others, the active support of our team in ongoing empirical research projects, for example in the fields of international trade and environmental economics and assistance with the preparation of courses offered by the chair.

We require you to have a strong interest in working in an academic environment and to be able to work independently. For a successful application, you have to have completed an introductory econometrics course (e.g. EWF I) with an above-average grade. Knowledge of international trade theory, as well as experience with LaTeX and STATA and/or Matlab/R would be an asset but are no strict requirements.

We offer you a multifaceted and interesting position, challenging tasks, and a productive working environment in an open-minded and highly motivated team.

If you wish to join our team, please send an application with your curriculum vitae, a copy of your high school diploma, and a transcript of records (master students please add a transcript of your completed undergraduate degree) until February 29 via email to:
